## DETAILED ACTION

### *Information Disclosure Statement*

Examiner has considered applicant's Information Disclosure Statement submitted on 9/19/2006.

### *Claim Rejections- 35 U.S.C § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-3 are being rejected under 35 U.S.C 103(a) as being unpatentable over U.S Patent 6,285,991 to Powar in view of US 2002/0029190 to Gutierrez-Sheris.

Regarding claim 1, Powar discloses a process for issuing an e-mail bank account statement, characterized in the accounts statements is transmitted within minutes by the mail server of the bank computer by email to the holder of the debited account (column 16, lines 56-60; column 17: lines 6-9, 18-20,27-28, 48-54; column 18: lines 32-33). However Powar does not disclose in the context of on line money transfer via the Internet. Gutierrez-Sheris discloses on line money transfer via the Internet (paragraphs: 0012, 0017). Therefore it would have been obvious to one of ordinary skill in the art at the time of the invention to modify Powar's invention to include on line money transfer via the Internet. One of ordinary skill in the art would have been motivated to include on

line money transfer via the Internet in order to ensure that the monies are received by the beneficiary as quickly as possible.

Regarding claim 2, Powar discloses the process according to claim 1. However Powar does not disclose characterized in that the mail server co acts with the server script of the computer for capturing and processing the required data to a web browser. Gutierrez-Sheris discloses the mail server co acting with the server script of the computer for capturing and processing the required data to a web browser (Fig 11: 1120, 1160, 1170, 1180, 32, 12). Therefore it would have been obvious to one of ordinary skill in the art at the time of the invention to modify Powar's invention to include the mail server co acting with the server script of the computer for capturing and processing the required data to a web browser. One of ordinary skill in the art would have been motivated to include the mail server co acting with the server script of the computer for capturing and processing the required data to a web browser in order to ensure that the entire process runs efficiently. Powar further discloses the transmission of the accounts statement (column 17, lines 48-52).

Regarding claim 3, Powar discloses the process according to either of claims 1 and 2. Powar further discloses an account statement that is also transmitted to the beneficiary (column 17, lines 48-52).
